

Experiment : 10

Aim :

TO Create a snapshot and test to see if the deleted content are restored after reloading the version of the OS.

Procedure :

- * Create a snap shot of the Virtual machine

- * Deleted few files and restore to snap shot by launching the snapshot version of the VM

- * Shut down the VM and Create a clone of VM under Manage VM.

- * Open the VMC file from the cloned location of the VM and test the cloned Version.

- * Implement the verify snapshot by taking minimum 10 Screenshot.

Result :

Hence I Create a snapshot and test to see if deleted content are restored Executed successfully and verified

Output

Devices

Memory	2GB
Processors	2
Hard Disk (NVMe)	60 GB
CD/DVD (SATA)	windows . iso
Network Adaptor	NAI
USB controller	present
Sound card	Auto Detect
Display	Auto Detect

Snapshot Manager:
